

Important warning!

Dear business partners, dear customers,

these days a lot of cheaper plagiarismes of our gear reduction starters 2,7kW/12V is getting at the market more and more often.

Original product

Plagiarism - MAGNETON logo is missing

MAGNETON original label

MAGNETON original box

Updated colour workmanship of MAGNETON starters

1. How can you recognize a plagiarism?

Original starters have MAGNETON logo on their rear cover castings. The updated colour workmanship of MAGNETON starters uses the black colour painting only on the stator and solenoid, aluminium parts are without painting. Another identification is P/N label and original box - see photo.

2. How do the plagiarismes work on engine?

The power and torque are according to comparing test lower at about 15% than at originals. This causes worse cranking especially at cold weather period, when using an older battery or after longer vehicle out of operation time. The total lifetime of plagiarismes is significantly lower (even by 50%), which means oftener repairs in field or complete starter replacements.

3. What is the guarantee?

MAGNETON provides 2 years warranty for his own products. Plagiarismes are usually offered with 6 months warranty, which does not comply with EU standard. MAGNETON a.s. has no responsibility for failures on starter plagiarismes or engine damages caused by using non-original product. Plagiarismes cannot be claimed in MAGNETON.

If you met any plagiarismes yourself, we will appreciate if you share your experience by e-mail marketing@magneton.cz. Thank you.
